

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A composition comprising:
 - a glycol;
 - a silicone, wherein the amount of silicone present in the composition is ~~2~~ 4% to 30% by weight;
 - a quaternium, wherein the amount of quaternium present in the composition is 3% to 20% by weight;
 - a polymer viscosity modulator, wherein the amount of polymer viscosity modulator present in the composition is 0.2% to 1% by weight; and
 - wherein the composition is suitable for being left on the skin, free of an alpha-hydroxy acid and has a pH in a range of 2.8 to 3.2.
- 2-3. (Cancelled)
4. (Original) The composition of claim 1, wherein the composition has a pH of 3.
5. (Cancelled)
6. (Previously Presented) The composition of claim 1, comprising:
 - about 1% to about 10% glycol by weight;
 - ~~about 4% to about 30% silicone by weight;~~
 - ~~about 0.1% to about 20% quaternium by weight;~~
 - ~~about 0.01% to about 1% polymer viscosity modulator by weight;~~ and
 - about 60% to about 90% water by weight.
7. (Original) The composition of claim 1, wherein the glycol comprises a material selected from the group consisting of propylene glycol, butylene glycol, glycerin, ethoxy diglycol, and mixtures and blends thereof.

8. (Original) The composition of claim 1, wherein the silicone comprises dimethicone.
9. (Previously Presented) The composition of claim 1, wherein the quaternium is a blend of behentrimonium methosulfate and cetearyl alcohol.
10. (Original) A composition of claim 1, wherein the polymer viscosity modulator comprises a material selected from the group consisting of polyquaternium-37, propylene glycol dicaprylate/dicaprate, PPG-1 trideceth-6, and mixtures and blends thereof.
11. (Original) The composition of claim 1, further comprising a vegetable oil.
12. (Original) The composition of claim 11, wherein the vegetable oil comprises an avocado oil.
13. (Original) The composition of claim 1, further comprising at least one material selected from the group consisting of ascorbyl palmitate, tocopherol, aloe barbadensis, aloe vera extract, persea gratissima, avocado oil, ethylhexyl palmitate, lecithin, capric triglyceride, caprylic triglyceride, isopropylparaben, isobutylparaben, butylparaben, methylparaben, alcohol, BHT, and blends and mixtures thereof.
14. (Original) The composition of claim 1, wherein the composition comprises an emulsion.
15. (Previously Presented) A method comprising:
 - applying a quantity of a composition to a portion of human skin, the composition comprising a glycol, a silicone, a quaternium, and 0.2% to 1% by weight of a polymer viscosity modulator, wherein the composition is free of an alpha-hydroxy acid and has a pH of less than 3.53;
 - rubbing the skin to distribute the composition over the skin; and
 - leaving the composition on the skin.

16. (New) A composition consisting of:
- a glycol;
 - a silicone, wherein the amount of silicone present in the composition is 4% to 30% by weight;
 - a quaternium;
 - a polymer viscosity modulator; and
- wherein the composition is suitable for being left on the skin and has a pH of less than 3.0.
